Winter Hiking

## TOUR DESCRIPTION

This beautiful circular hike, centrally located around the districts of Hirschegg and Mittelberg, becomes an exciting family adventure thanks making this a varied and entertaining winter hike for the whole family.

Starting at the Walserhaus, the loop leads past the church in Hirschegg and down into Dörenbodenstraße. From there, the trail continues then climbs uphill toward Ahorn. The route then leads above the main road into the Rohrweg, offering beautiful views out of the valley.

## ROUTE DESCRIPTION

From the Walserhaus we cross the main street and walk down to the Dörenbodenstraße at the church vorbei. Once at the bottom we see the crossing we keep left & follow the Haldeweg towards Mittelberg. Soon we come to 2 single houses, there it goes up the mountain slope. After Rohrweg in the direction of Hirschegg, at the top, the Rohrsee / reservoir awaits us, this serves the Heuberg ski area as water for machine-maintenance. The right of the house leads us directly down to Hirschegg.

### **How do you consciously experience nature?**

Nature is so much more than the backdrop for unforgettable mountain experiences. It is a habitat for animals and plants. It provides valuable raw materials such as wood, it also protects against avalanches and mudslides and regulates the climate. It is up to us to see what we can achieve more:

Smart in **NATURE**

**CONSCIOUS** together

**EXPERIENCE** foresight

## **Smart in NATURE**

Take a deep breath and recharge your batteries, be outside and feel free. When we enjoy nature, we are guests in the living room of someone's living space with you in the future too.

### **Stay on paths and marked routes**

If you follow the marked paths and routes, you are sure to come to new favorite places. In this way you also respect protected areas, any disturbance unnecessarily costs the wild animals the strength they need to survive.

### **Avoiding twilight times**

Standing on a mountain at sunrise is a special experience. The morning and evening hours are also the time when most wild animals are avoided, please stay on the marked path, do not use a bright headlamp and enjoy the silence.

## **Stay clean & take rubbish with you**

It goes without saying: You take rubbish with you again, on the mountain and in the valley. Please also organic waste, because it is common at home or in your accommodation - please remember that there are no rubbish bins in public spaces in Kleinwalsertal.

On the natural toilet

If you are looking for a quiet place, please be at least 50 m away from water. Bury excrement or cover it with a large stone. Use fallen

## **On tour with a dog**

Are you always in control of your four-legged partner, even if he gets his nose for marmots, deer or other wild animals? You are both on guard. An attack by a grazing animal is foreseeable: leash off immediately. There are numerous dog stations in the valley for the disposal of dog waste and fields contaminated by the feed and makes grazing cattle sick.

## **CONSCIOUS to each other**

## **Consideration for other athletes and those looking for relaxation**

Everyone loves to enjoy a special piece of earth for themselves. But most of the time we are not traveling alone. No problem, because in a respectful manner, provide support when someone needs help and always give a smile. So nothing stands in the way of friendly cooperation and

## **Appreciating the preservation of the cultural landscape**

Alpine landscapes are touching with their contrast: Imposing peaks and natural forests alternate with gentle valleys, well-tended meadows at high altitudes is no coincidence, but the result of an interplay of natural and cultural landscapes. Behind this is the work of farmers, alpine herders. The attractiveness of the recreation and leisure area and the diversity of species are preserved. We already say thank you if we stay on the

## **Safe on tour - for you and others**

Whether on a ski or snowshoe tour in winter or on a mountain tour in summer, anyone who is out and about in alpine terrain has to be equipped with the right equipment. Correctly assessing alpine dangers requires a lot of knowledge and experience. Why not learn from professionals?
