

MEDIUM SKI TOURING

## TOUR DESCRIPTION

Everything you want for a ski tour: With **almost 1000 meters of elevation gain** the ascent is athletic and demands fitness. Far from ski operations, you immerse yourself in the quiet of winter. Once at the summit, a wonderful view over Kleinwalsertal, Kuhgehrenspitze, Elfer & Zwölfer awaits. Finally, you are rewarded with a great descent.

The Wildental is also popular with winter hikers in winter. Especially on the first section up to just before the Inner Wieselpe, more consideration is required for other winter sports enthusiasts during ascent and descent. Then there is enough space and enjoyment of nature for everyone.

**Experience nature consciously** stands for respectful coexistence among winter sports enthusiasts and towards nature. The described route respects the designated forest and wildlife protection areas in Wildental.

## ROUTE DESCRIPTION

### Ascent

The start of the route is at the Schwendle parking lot, which can be easily reached by bus (Walserbus from Oberstdorf). First, we follow the winter hiking trail towards Wildental. Passing the upper Wieselpe, we enter the gentle forest clearing located about 500 m south of the upper Wieselpe. After about 40 minutes (at an altitude of 1,620 m) we veer left into the now flatter gully and follow it until we reach the summer path from Innerkuhgehrenalpe to Wannenalpe at about 1,700 m. From here we mostly follow the summer path, reaching the open slopes of Wannenalpe by a switchback. Heading east for about 800 m, we then reach the ridge north of it, which divides the hollow between Walser Hammerspitze and Hochgehrenspitze. We follow the ridge toward the summit. We reach the summit via the southern ridge, aiming for the saddle between Hochgehrenspitze and Walser Hammerspitze at its flattest point and continue on the ridge to the summit.

### Descent

The descent follows the ascent route. In the sparse forest, we seek proximity to the ascent track to avoid damaging the young forest.

## RECOMMENDED EQUIPMENT

Outside secured pistes and trails, everyone is responsible for themselves and travels at their own risk and must inform themselves about alpine hazards, especially **avalanche danger**.

Weather and snow conditions may necessitate changes in the route.

The GPS track provided is merely a suggestion. No liability can be assumed for the accuracy of the information.

### EMERGENCY NUMBERS:

- 144 Alpine emergencies Vorarlberg

### Condition

### Best season

 JAN FEB MAR APR MAI JUN  
 JUL AUG SEP OCT NOV DEC

Sart: Mittelberg

Goal: Mittelberg

- 112 Euro emergency call (works with any mobile/ network)

Complete ski touring equipment including avalanche emergency gear: avalanche transceiver, shovel and probe (standard); optional backpack with avalanche airbag
